

RESPONSE under 37 C.F.R. § 1.111  
U.S. Appl. No. 10/719,537

**IN THE CLAIMS:**

1. (Currently amended) A timepiece comprising:
  - a casing;
  - a display device secured by the casing; and
  - ~~an attachment section~~ a clip pivotally attached to the casing; andwherein the clip attachment section is configured to be attachable to an object of interest and wherein the clip is configured to pivot in a position to maintain the display device in a substantially upright position when the attachment section is placed on a substantially horizontal surface.
2. (Original) The timepiece of claim 1 wherein the display device comprises a watch module.
3. (Currently amended) The timepiece of claim 2 wherein the watch module includes a time mode and one or more modes selected from a group consisting of a time mode, an altimeter mode, a compass mode, a barometer mode, an alarm mode and a chronograph mode.
4. (Currently amended) The timepiece of claim 1 wherein the clip attachment section comprises a carabiner clip.
5. (Original) The timepiece of claim 2 further comprising a temperature sensor coupled to the watch module and wherein the display device is operable to display a temperature.
6. (Currently amended) An attachable display apparatus comprising:
  - a casing configured to hold an electronic device having a display; and

RESPONSE under 37 C.F.R. § 1.111  
U.S. Appl. No. 10/719,537

~~an attachment section~~ a stand coupled to the casing, ~~the stand having at least a portion thereof formed as a clip~~ and configured to attach and detach with an object of interest;

wherein the casing and the ~~attachment section stand~~ are coupled such that they move with respect to each other and can be configured to lie essentially in the same plane to form a first configuration and can be configured to form an angle of ninety degrees or less between the ~~attachment section stand~~ and the casing ~~section~~ to form a second configuration.

7. (Currently amended) The apparatus of claim 6 ~~wherein further comprising the electronic device comprises a watch module.~~

8. (Currently amended) The apparatus of claim 7 wherein the electronic device comprises a watch module that includes a time mode and one or more modes selected from the group consisting of a time mode, an altimeter mode, a compass mode, a barometer mode, an alarm mode and a chronograph mode.

9. (Currently amended) The apparatus of claim 6 wherein the clip attachment section comprises a carabiner clip.

10. (Currently amended) The apparatus of claim 7 ~~8~~ further ~~comprises comprising~~ a temperature sensor coupled to the watch module and wherein the watch module is operative to display an ambient temperature.

11. (Currently amended) The apparatus of claim 6 ~~7~~ wherein the electronic device comprises one selected from a group consisting of a MP3 player, a multi-function display device, a cell phone, a personal digital assistant, a calculator, and a digital camera.

RESPONSE under 37 C.F.R. § 1.111  
U.S. Appl. No. 10/719,537

12. (Currently amended) The apparatus of claim 6 further comprising a hinge section configured to connect the ~~attachment section~~ stand with the casing section in a pivoting manner.

13. (Currently amended) The apparatus of claim 6 7 wherein the electronic device includes a multi-function module configured to identify and display an altitude, a temperature, a time a date, and a compass heading.

14. (Currently amended) The apparatus of claim 6 wherein the second configuration maintains the display in an upright position while the ~~attachment section~~ stand is placed on a substantially horizontal surface.

15. (Currently amended) The apparatus of claim 6 7 wherein the electronic device is a radio communication device.

16. (Original) An apparatus comprising:  
an electronic device having a display;  
a casing configured to hold the electronic device; and  
a clip pivotally attached to the casing, the clip configured to be attachable to an object of interest, the clip configured to be pivoted to form a stand for the apparatus.

17. (Original) The apparatus of claim 16 wherein the electronic device comprises a watch.

18. (Original) The apparatus of claim 16 wherein the electronic device comprises an altimeter.

**RESPONSE under 37 C.F.R. § 1.111  
U.S. Appl. No. 10/719,537**

**19. (Original) The apparatus of claim 16 wherein the electronic device comprises a personal audio device.**

**20. (Original) The apparatus of claim 16 wherein the electronic device comprises a radio communication device.**

**21. (Original) The apparatus of claim 16 wherein the electronic device comprises a digital camera.**

**22. (Original) The apparatus of claim 16 wherein the electronic device comprises a calculator.**
